Standards of Practice  |  January 2017  |  Physiotherapy Alberta - College + Association

Standards of Practice  
Client Assessment, Diagnosis, Interventions

Standard
The physiotherapist demonstrates proficiency in client assessment, diagnosis, and interventions to deliver quality client-centered services.

Expected outcome
Clients can expect the physiotherapist to select appropriate assessment tools, make an informed physiotherapy diagnosis, and apply intervention procedures that are carried out proficiently for quality delivery of physiotherapy services.

Performance expectations
The physiotherapist:
- Delivers only services that are clinically indicated for clients and that he/she is competently able to provide.
- Advocates within her/his capabilities and context of practice for clients to obtain the resources they require to meet their health goals.

Clients are recipients of physiotherapy services, and may be individuals, families, groups, organizations, communities, or populations. An individual client may also be referred to as a patient. In some circumstances, clients/patients may be represented by their substitute decision-makers.

Informed consent refers to “receiving client or their legally authorized representative's permission to proceed with an agreed course of physiotherapy service. Consent may be revoked at any time...Consent can be written or oral, and may be expressed or implied. Having a written consent form does not mean there is informed consent. Informed consent involves ongoing communication between the parties involved.”

Interventions refer to physiotherapy services that “include but are not limited to education and consultation, therapeutic exercise, soft tissue and manual therapy techniques including manipulation, electro-physical agents and mechanical modalities, functional activity training, cardio-respiratory and neuromotor techniques, and prescribing aids and devices.”

Physiotherapy services are “services provided by or under the direction of a physiotherapist. This includes client assessment and intervention, and related communication with and reporting to various parties for the purposes of delivering patient care.”

Proficiency means performance consistent with the established standards in the profession.

Quality of health-care services refers to the “acceptability, accessibility, appropriateness, effectiveness, efficiency, and safety” of the services provided.
